

Let's Learn About Chickens

with William

I love chickens; they're amazing, and did you know that chickens can love people, too? Chickens can make friends with people and other animals, but their favourite is other chickens. Their memories are amazing, too; they can remember more than 100 faces. Chickens talk to their friends and can make more than 30 different sounds; that's like 30 different words. Hens talk to their eggs, too. That's like my mum talking to me when I was a baby. Chickens can eat loads of different foods, but they eat rocks as well. This is because they don't have teeth, so they eat small stones to grind food down their food. Chickens can't fly very far, but they can run really fast, 9mph; that's faster than a human. Did you know that chickens love music? They like calm music most.

Can you answer the questions about chickens?

How many sounds can chickens make?

What music do chickens like the most?

How fast can chickens run?

What do chickens eat that isn't food?
